

To attach dressage webbers to an Energist model, undo the skirt lace and fold the skirt flap back to expose the stirrup bar.

Swivel the stirrup bar up slightly to allow the loop end of the Webber to be slipped easily onto the open end of the bar.

Push the Webber loop firmly onto the stirrup bar and pull it down firmly to swivel the bar back into position.
NB – the Webber is shown here with the soft hide uppermost, but placing the hide next to the flap leather will reduce any scuffing.

Thread the lace back through the skirt flap to close.

Pull the lace down firmly to secure the skirt firmly into place.
