

We only recommend the Royal Rider lightweight polymer stirrups for use with the *Solution*. The stirrup should be fitted with the rolled edge of the tread facing outwards to be positioned facing backwards on the rider's foot.

The stirrup incorrectly fitted with the rolled edge facing inwards.

If the stirrups are crossed over the saddle, the rolled edge of the treads should always face outwards to avoid scratching the flap leather.

The stirrups incorrectly crossed over with the rolled edge of the tread against the flap.
